SUMMARY

Results-driven **.NET Full Stack Developer** with **2 years of experience** in building scalable, high-performance applications. Expertise in **C#, .NET Core, SQL, Angular, React, JavaScript, and Azure**, with a strong background in **microservices, API development, authentication (SSO, MFA), DevOps, and cloud deployments**. Proficient in AI-driven development, leveraging tools like **ChatGPT, Claude, and Copilot** to enhance coding efficiency and problem-solving. Skilled in using industry-standard development tools such as **VS Code, Visual Studio, SQL Server, Azure, and Postman**. Detail-oriented, collaborative, and eager to continuously learn and apply best practices in software development.

WORK EXPERIENCE

Insight Consultants, Bengaluru

March 2023 - Present

Junior Software Engineer

- **DeedAI Project:** Designed and developed an AI-driven property management system to extract document data and store structured results in SQL Server. Implemented authentication using Microsoft Identity and managed database migrations. Improved document processing accuracy by 40% and reduced manual effort. (C#, .NET Core, React, SQL, Pipelines)
- **Agent & Online Portal:** Built a fully responsive UI and optimized API performance by implementing batch processing for large data sets. Developed Single Sign-On (SSO) for seamless authentication across multiple applications. Reduced API response time by 50% and enhanced user experience. (C#, .NET Core, SQL, RMQ, SSO)
- **BIS Admin Portal:** Upgraded a legacy system by implementing Multi-Factor Authentication (MFA), automated notifications, and system optimizations. Strengthened security and minimized unauthorized access incidents. (C#, .NET Core, AngularJS, SQL Server, Azure)
- **Fraud Detection System:** Developed an Azure Function App that integrates with bank APIs to calculate risk scores and detect fraudulent transactions. Enhanced fraud detection accuracy while minimizing false positives. (C#, .NET Core, SQL, Azure Functions, APIM, Key Vault)
- **MyPortal (Internal OKR Tracking System):** Designed and built a microservices-based application with Row-Level Security (RLS) and API Gateway architecture, ensuring secure access to OKR data. Integrated AI-driven development methodologies to accelerate project completion and enhance efficiency. (C#, .NET Core, Angular, SQL, Microservices, Azure, Linux)

EDUCATION

B.E. Mechanical Engineering, Dr. Ambedkar Institute of Technology, 2022 (7.67 CGPA)

ACHIEVEMENTS & CERTIFICATIONS

- **1st Place:** Azure Aspire Containerized Deployment POC
- **3rd Place:** AI-based Resume Parser Hackathon
- **Certifications:** Microsoft DP-900, Design Patterns - Udemy

SKILLS

- **Languages & Frameworks:** C#, .NET Core, ASP.NET, JavaScript
- **Frontend:** React, Angular, HTML, CSS, Bootstrap
- **Backend:** Microservices, Web APIs, Authentication (SSO, MFA), Design Patterns
- **Database:** SQL Server, Azure SQL, Stored Procedures, Triggers, RLS
- **Cloud & DevOps:** Azure, Function Apps, APIM, Managed Identity, IIS, Linux, CI/CD Pipelines
- **AI & Productivity Tools:** ChatGPT, Claude, Copilot, VS Code, Visual Studio, SQL Server, Postman, Azure
